

New ZEGA Pod System | CALIBURN GZ2

**THE MINI
THE MIGHTY**

We proudly introduce a whole new form factor for Pod System: ZEGA. Unlike Pen Pod, Tube Pod or Square Pod, ZEGA is a truly palm-sized Pod with up to 50% smaller front surface area, yet an increment of over 20% battery capacity comparing previous UWELL Pod systems. ZEGA definitely opens up a new page in Pod evolution.

Under ZEGA, we debut two models to start with, AZ3 and GZ2. AZ3 supports A3 cartridges and GZ2 supports G2 cartridges. AZ3 uses a breath-like slow pulse LED indicator while GZ2 features Tron-style RGB light. The GZ2 includes a 3-Step Refill Mechanism (U-Valve), an Integrated On-Pod Precise Airflow Control (iAFC) and Juice Window (ClearView).
