

# CALIBURN

CALIBURN AZ3 (Grace) Pod System

## User Manual

### Illustration

### Quick Guide

1. Take off the cap and attach it to the bottom of the device with built-in magnets. Pull out the pod and remove the insulating film from the bottom of the pod, then install the pod back into the device.
2. Remove the drip tip and fill the pod with e-liquid, and let the pod sit for 10 minutes after its first filling.
3. Insert the pod into the device and draw to vape.

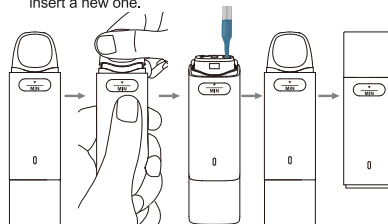

### Specifications

- Materials: PCTG, PC+ABS
- Dimensions: 25.8 mm x 23.7 mm x 72.4 mm
- Net Weight: 47 g
- E-liquid Capacity: 1.8 ml
- Output Power: Maximum 17 W
- **Pod Specifications:**
  - FeCrAl Meshed 0.8  $\Omega$  CALIBURN A3 Refillable Pod (pre-installed)
  - FeCrAl Meshed 1.0  $\Omega$  CALIBURN A3 Refillable Pod (spare)
- Battery Capacity: 750 mAh

### Instructions

#### 1. Pod filling and replacement

- a. Before the first filling, take the cap off and attach it to the bottom of the device with built-in magnets. Pull out the pod and remove the insulating film from the bottom of the pod, then install the pod back into the device.
- b. Remove the drip tip in the direction shown in the following graphic.
- c. Fill the pod through the red filling port and put the drip tip back when the filling is done. The clicking sound hints at proper installation.
- d. Let the pod sit for 10 minutes before use.
- e. For pod replacement, please remove the used pod and insert a new one.

**Attention:**

- a. Do not fill the e-liquid into the airway in the middle of the pod and make sure that the e-liquid is filled through the red filling port. Put the drip tip back as soon as the filling is done and make sure it is properly installed to prevent e-liquid leakage.
- b. Let the pod sit for 10 minutes after the first filling to avoid coil burning.
- c. Please make a timely refilling when the e-liquid is under the MIN level.

**2. Vaping**

Please draw to vape and the LED indicator will stay lit during vaping.

**3. Battery level indication**

During vaping, the indicator stays green if the battery level is over 60%, stays blue if the battery level is 30% - 60%, and stays red if the battery level is under 30%. The LED indicator flashing ten times in red indicates a low battery level and the device will stop outputting.

**4. Charging**

Connect the device to a power source through a Type-C charging cable, and then the LED indicator will light up. The LED indicator flashing in red indicates a low battery level, flashing in blue indicates a medium battery level, and flashing in green indicates a sufficient battery level. The LED indicator stays green when the charging is done.

**5. Protection and Indication**

- a. Short-circuit protection: When a short-circuit occurs, the LED indicator flashes 3 times in red and the device stops outputting.
- b. Low voltage protection: If the battery level goes below the safety level, the indicator will flash 10 times in red and then the device stops outputting.
- c. Overtime protection: The LED indicator flashes 5 times in green to indicate an over 8-second vaping and the device will stop outputting.
- d. Open-circuit protection: If the pod is not connected or poorly connected, the device will signal this by flashing in blue 3 times.

**Warm Tips**

1. Please charge with the certified power adaptor (5V/2A) and USB cable.
2. Please remove the pod from the device and store it separately when you travel by air, for the air pressure change may cause leakage.
3. Avoid high temperature, low temperature, flammables, explosives, water, and humid environment during the use or storage of the product. Please do not keep the product with hard objects to avoid damage. Please charge the device at least once a month.

**WARNING**

**The new FDA regulations apply to the sales and distribution of all E-cig products.**

1. Do not give away free samples.
2. It is prohibited to sell all types of E-cig products to people under the age of 21.
